

Type of Surveys	January	February	March	April	May	June	July	August	September	October	November	December	Survey licence required?
<b>Bats</b>													
 Scoping survey													Yes
Activity survey													No
Swarming survey													No
Hibernation survey													Yes
<b>Great Crested Newts</b>													
 Habitat suitability assessment													No
Aquatic population survey													Yes
Terrestrial Presence/Absence Survey													Yes
<b>Badgers</b>													
 Activity survey													No
Bait marking study													No
<b>Birds</b>													
 Breeding bird survey													No
Migrant passage													No
Wintering bird survey													No
<b>Reptiles (Common Species)</b>													
 Population survey													No
<b>Water Vole</b>													
 Activity survey													No
<b>Otter</b>													
 Activity survey													No
<b>Dormice</b>													
 Nut search													No
Nest box/tube													Yes
<b>White Clawed Crayfish</b>													
 Activity survey													Yes
<b>Habitats</b>													
Extended Phase 1 Habitat survey													No
National vegetation classification survey													No

This table provides information on species commonly encountered on development sites. It is intended as an overview only. Habitats and species are site-specific, please contact:

Type of Surveys	January	February	March	April	May	June	July	August	September	October	November	December
 <b>Bats</b>	Works on maternity or low impact roosts		Works on hibernation, maternity and low impact roosts		Works on hibernation or low impact roosts				Works on hibernation, maternity and low impact roosts		Works on maternity and low impact roosts	
 <b>Great Crested Newts</b>	Pond management and enhancements		Terrestrial and aquatic trapping and translocation					Terrestrial trapping and translocation				Pond management and enhancements
 <b>Badgers</b>	No disturbance to existing setts. Construction of artificial setts and monitoring only							Exclusion from or destruction of existing setts				As January - June
 <b>Nesting birds</b>	Vegetation clearance		Main nesting season - no clearance or construction within 5m of bird nest - seek ecological advice							Vegetation clearance		
 <b>Reptiles</b>	Hibernating - above ground vegetation, clearance only		Capture and translocation programmes				Capture and translocation programmes	Capture, translocation and habitat clearance	Capture, translocation and habitat clearance		Hibernating - above ground vegetation clearance only	
 <b>Water voles</b>	Hibernation period - no works in habitat		Trapping translocation and exclusion			Breeding period - no works			Trapping translocation and exclusion		Hibernation period - no works in habitat	
 <b>Otters</b>			No seasonal constraints, however works likely to be restricted where otters are found to be breeding									
 <b>Dormice</b>	Above ground vegetation clearance by hand only				Translocation and stump/root clearance					Above ground vegetation clearance by hand only		
 <b>White Clawed Crayfish</b>		No captures		Capture and exclusion		No captures		Capture and exclusion programmes				No captures
 <b>Vegetation/habitats</b>	Planting and translocation		Planting and translocation						Planting and translocation		Planting and translocation
